PROJECT OVERVIEW

The lightsaber, sometimes referred to as a laser sword, is a weapon used by the Jedi, the Sith, and other Force-sensitives. Lightsabers consist of a plasma blade, powered by a kyber crystal, that is emitted from a usually metal hilt. It is a weapon that requires skill and training, and is greatly enhanced when used in conjunction with the Force. Though also used by the Sith, the lightsaber is synonymous with the Jedi, with some in the galaxy believing only Jedi use lightsabers.

I am creating a product page to describe all of the functionality and specifications of lightsabers, so that interested buyers can customize and choose which lightsaber is best for them. Using HTML/CSS, Bootstrap, and jQuery, I can create a dynamic website with scrolling features and animations to really help make the features of this product shine.

FEATURES & INSPIRATION

Inspiration Sites:

<http://www.seattlecidercompany.com/>

<http://starwars.wikia.com/wiki/Lightsaber>

<http://www.ultrasabers.com/>

<https://saberforge.com/>

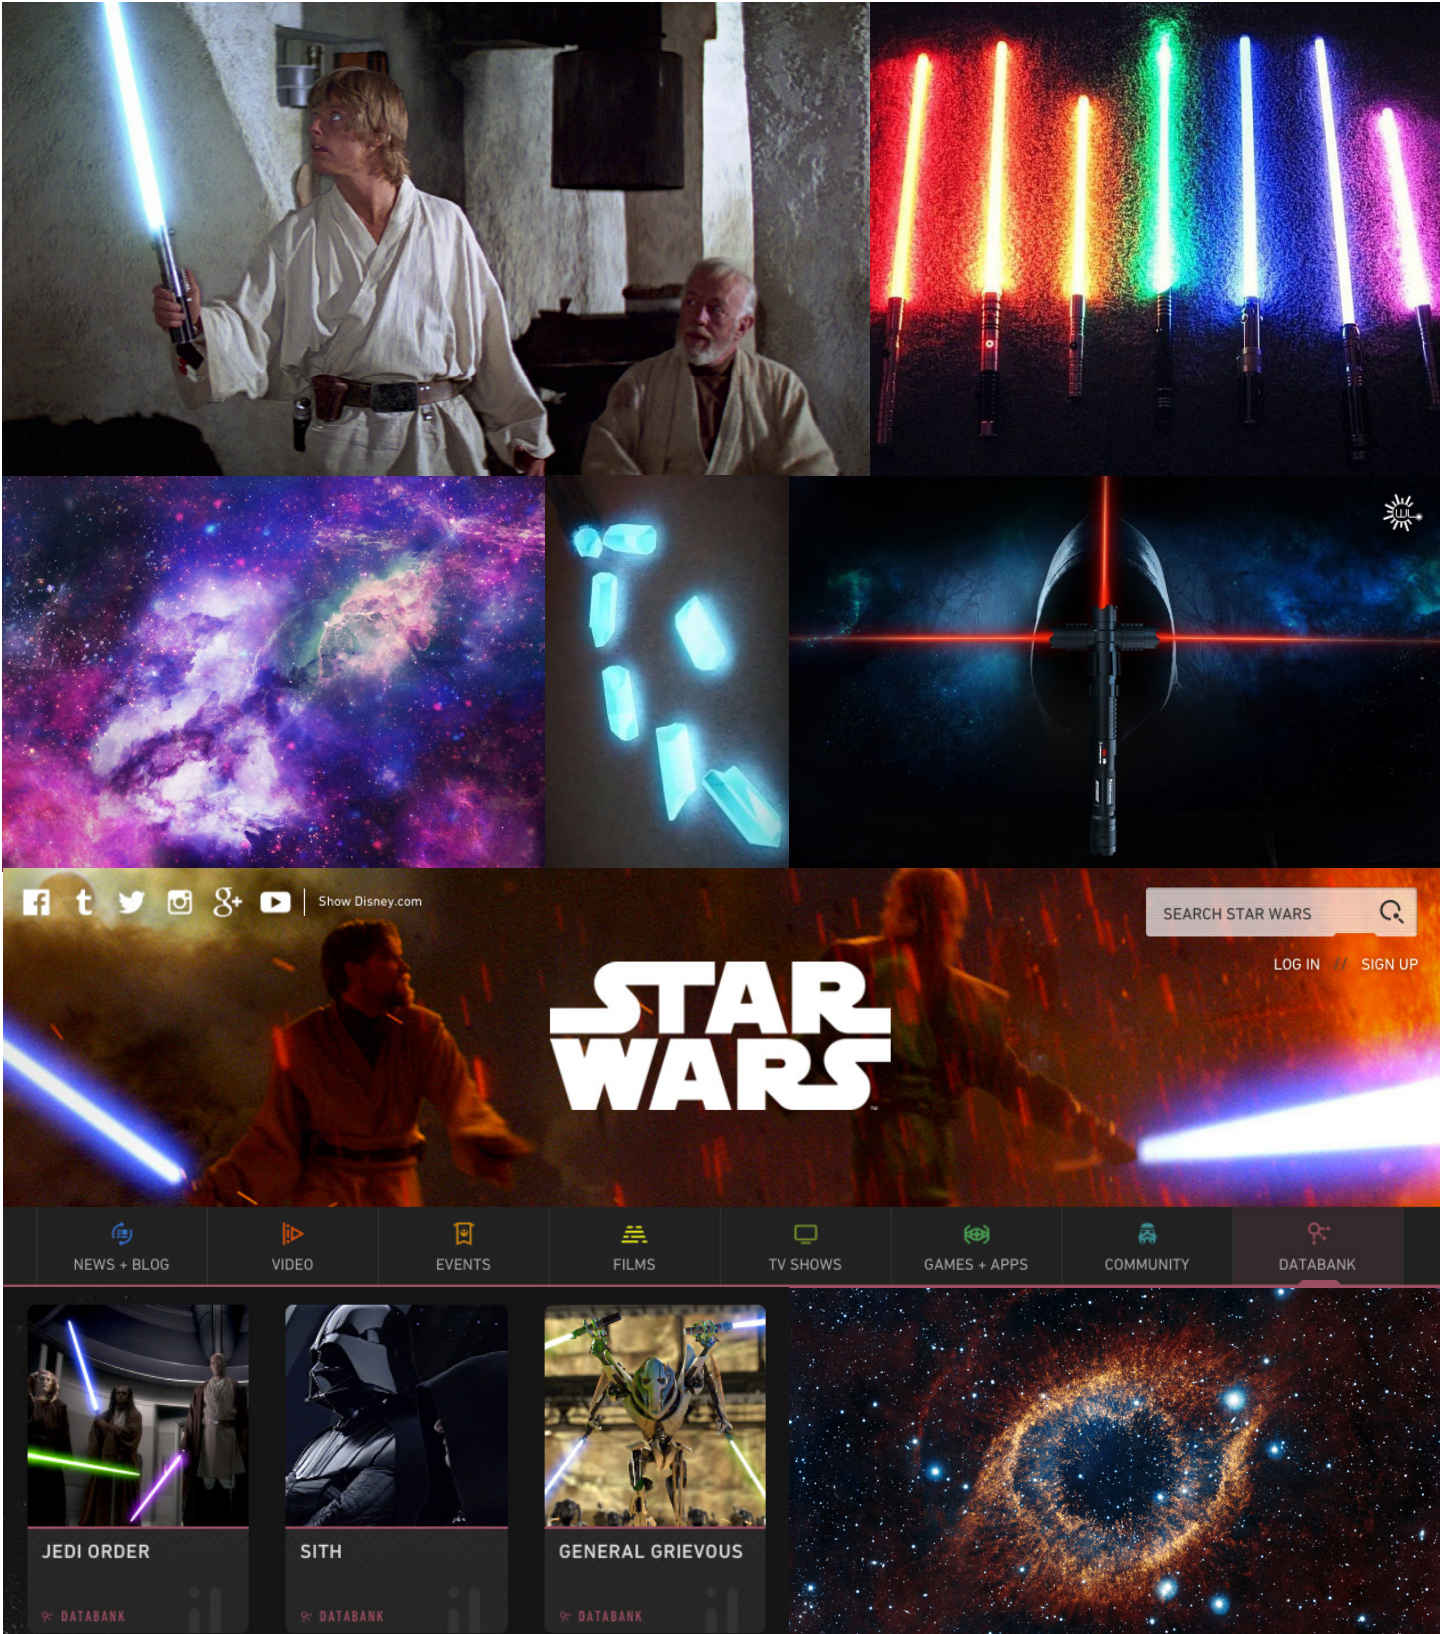

<http://kyberlight.com/>

<http://www.starwars.com/databank/lightsaber>

Features:

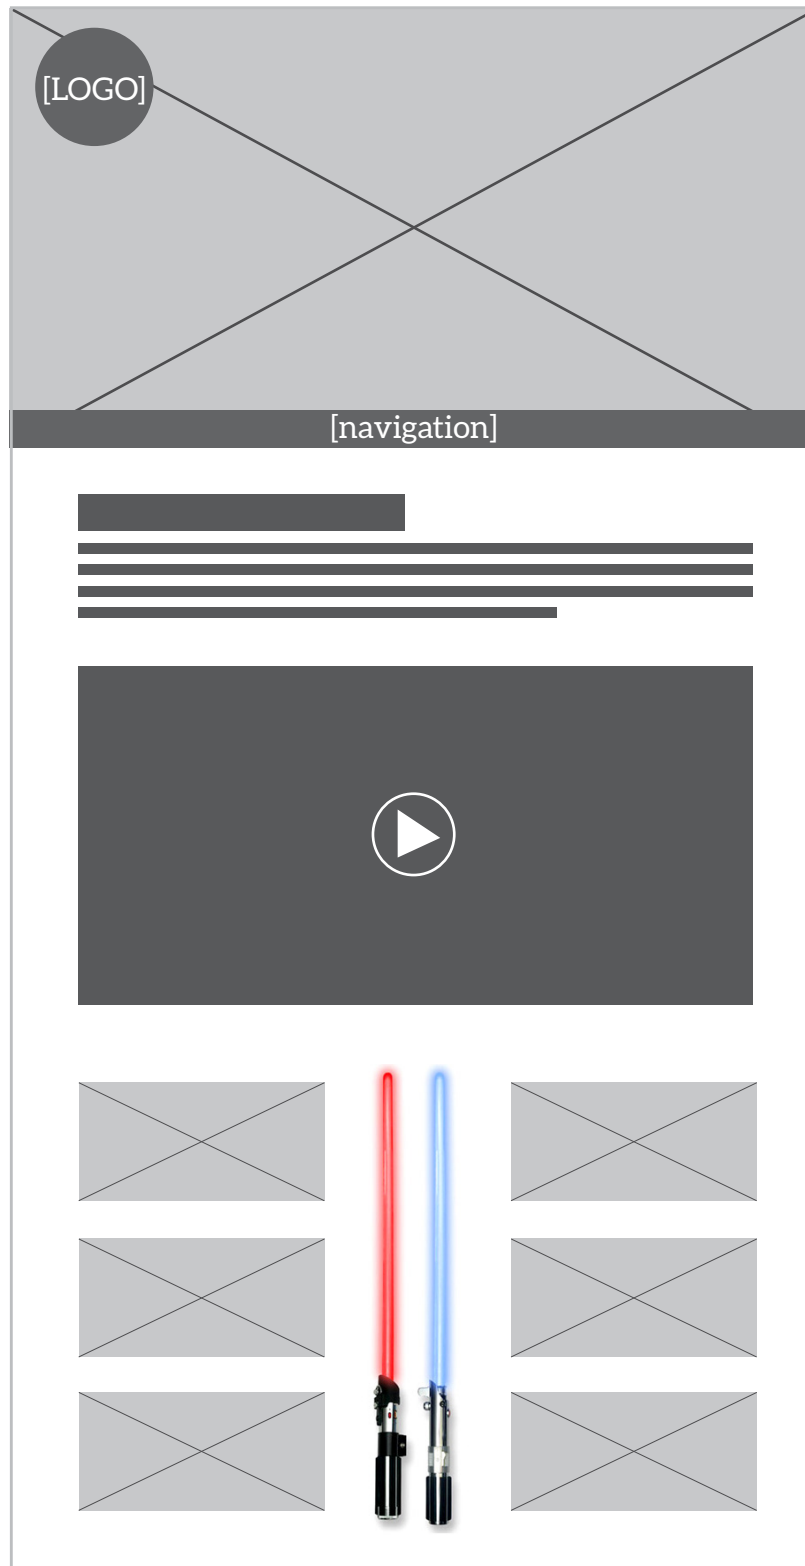

- Compelling and dynamic images
- Map of where the product can be purchased
- Photo gallery connected via Instagram of customer's photos of their sabers
- Case Studies from Jedis
- Responsive Single-Page Design
- Videos
- Animated Scrolling Effect
- Customer Reviews
- Social Media Integration
